

Developing a National Strategy for Through-life Engineering Services

Invitation to Workshops

This initiative is led by **Rolls-Royce plc** and the **High Value Manufacturing Catapult** and facilitated by the **EPSRC Centre for Innovative Manufacturing in Through-life Engineering Services**

Rolls-Royce and the **High Value Manufacturing Catapult** invite you to contribute to the development of a National Strategy in Through-life Engineering Services (TES) at one of a series of workshops to be held around the UK

Engineering services are an area of significant growth and deliver high productivity for engineering firms, asset owners and operators, and the UK as a whole. The benefits of developing a National Strategy to accelerate capability development was agreed a cross-industry meeting in May and ratified at a launch event at the Houses of Parliament in September

The workshops provide an opportunity for new contributors to this important programme to add value to their own engineering capability and transform engineering and productivity in the UK over the next 20 years

The workshops will brief participants on progress to date, build further evidence for the importance of engineering services and develop an understanding of the capabilities that deliver most value to firms practicing engineering services.

The National Strategy is facilitated by the EPSRC Centre for Innovative Manufacturing in Through-life Engineering Services (TES Centre) hosted by Cranfield and Durham Universities.

EPSRC Centre for Innovative Manufacturing

Through-life Engineering Services

The Workshops

Three regional workshops are planned in Bristol, Glasgow and Coventry. The venues will be the local High Value Manufacturing Catapult Centres

Dates, Timings and Venues

2nd December 2015, 10.30 to 16.00 National Composites Centre (NCC), Bristol, BS16 7FS

21st January 2016, 10.30 to 16.00 Advanced Forming Research Centre (AFRC), Glasgow, PA4 9LJ

26th January 2016, 10.30 to 16.00 Manufacturing Technology Centre (MTC), Coventry, CV7 9JU

Registration

If you would like to take part in one of these events please email **Lauren Dalzell** on lauren.dalzell@cranfield.ac.uk. Places are limited and early registration is advised. These events are free and the organisers may not be able to accept all applications for registration
